ODETTE SAYS · PRINTABLE SET

The Fridge & Pantry *Chart Set*

Four charts I keep on my own fridge. Print them once, and stop guessing.

1. How long it keeps
2. The stain chart
3. Surfaces & what never to mix
4. Kitchen conversions & temperatures

From my kitchen to yours

— *Odette*
@ODETTESAYS

US LETTER · PRINT AT 100%

BEFORE YOU PRINT

Ma chère,

Merci. You did a lovely thing for your kitchen.

These are the four charts I wish someone had pinned on my mother's fridge. How long the chicken really keeps. What to do in the first minute after the wine goes over. Which cleaner will ruin a marble counter. How many grams in a cup, when the recipe is American and your scale is not.

No reading needed. You look, you know, you get on with your day.

Bisous, Odette

PRINTING

Print on US Letter or A4 at "Actual size" or 100%. Thick paper or card stock lasts longest.

ON THE FRIDGE

Slip each chart into a clear sheet protector and hold it with two magnets. It wipes clean.

IN THE DRAWER

Keep the stain chart near the laundry, and the surface chart under the sink.

ON YOUR PHONE

Save this PDF to your phone too. Very handy in the supermarket.

Odette is a fictional character created with AI for the Odette Says channel. The figures in this set come from public food-safety guidance (USDA FoodKeeper, FoodSafety.gov). They are general guidance for home kitchens, not professional advice. When in doubt, throw it out, and always follow the instructions of your appliance and surface manufacturers. For your personal use only, please do not resell or share the file.

CHART 1

How long it keeps

Fridge at 40°F (4°C) or colder · freezer at 0°F (−18°C)

01

MEAT, FISH & EGGS

FOOD	FRIDGE	FREEZER
Raw chicken or turkey, pieces	1–2 days	9 months
Raw chicken or turkey, whole	1–2 days	1 year
Ground meat (beef, pork, poultry)	1–2 days	3–4 months
Steaks, chops & roasts	3–5 days	4–12 months
Fresh fish, fatty (salmon, tuna, mackerel)	1–3 days	2–3 months
Bacon	1 week	1 month
Deli meat, opened or sliced	3–5 days	1–2 months
Cooked leftovers (meat, poultry)	3–4 days	2–6 months
Soups & stews	3–4 days	2–3 months
Eggs, raw in the shell	3–5 weeks	**Do not freeze**
Eggs, hard-boiled	1 week	**Do not freeze**

DAIRY & JARS, ONCE OPENED

FOOD	FRIDGE	FREEZER
Milk	1 week	3 months
Butter	1–3 months	6–9 months
Hard cheese	3–4 weeks	6 months
Soft cheese (brie)	1 week	6 months
Yogurt	7–14 days	1–2 months
Fresh herbs	7–10 days	1–2 months
Mayonnaise	2 months	—
Ketchup	6 months	—
Jam & jelly	6 months	—
Mustard	12 months	—

PANTRY, UNOPENED

FOOD	CUPBOARD
Canned fruit, tomatoes, pickles, juice *(high-acid)*	12–18 months
Canned meat, fish, soup, vegetables *(low-acid)*	2–5 years
White rice	2 years
Dry pasta	2 years
White flour	6–8 months
Granulated sugar	2 years

Odette's tip: parsley, coriander and dill last about two weeks standing in a jar of water in the fridge, loosely covered with a bag.

2 hours

Never leave perishable food out longer. Only 1 hour when it is above 90°F (32°C).

Fridge, not counter

Thaw in the fridge or in cold water, never on the counter.

Freezer = quality

Frozen food stays safe; the times above are for best taste and texture.

Sources: FoodSafety.gov cold storage chart, USDA FoodKeeper, USDA shelf-stable food guidance. When in doubt, throw it out.

CHART 2

The stain chart

For washable fabrics. Always test on a hidden seam first.

02

BLOT
Press with a clean cloth. Rubbing spreads it.

COLD FIRST
Rinse with cold water from the back of the fabric.

NO DRYER
Heat sets a stain for good. Air-dry until it's gone.

Red wine

ACT FAST

1. Blot, then rinse with cold water from the back.
2. Rub in a drop of dish soap, leave 5 minutes, rinse.
3. On white cotton only: dab 3% hydrogen peroxide, then wash.

Coffee & tea

1. Rinse with cold water straight away.
2. Work in dish soap or liquid detergent, then wash.
3. Old stain: soak 30 minutes in 1 part white vinegar to 2 parts water.

Grease & oil

1. Cover with cornstarch or baking soda, wait 15 minutes, brush off.
2. Rub in dish soap with your fingers.
3. Wash in the warmest water the label allows.

Blood

COLD ONLY

1. Cold water only. Hot water cooks it into the fibre.
2. Rub gently with a little salt water or detergent.
3. On white cotton: a dab of 3% hydrogen peroxide.

Tomato sauce

1. Scrape off, rinse cold from the back.
2. Dish soap, gentle rub, rinse.
3. Dry in the sun: it helps the last orange fade.

Grass

1. Rub in liquid enzyme detergent, leave 15 minutes.
2. Still there: dab rubbing alcohol (test first).
3. Wash as usual.

Yellow collars & underarms

1. Paste of baking soda and water, or enzyme detergent.
2. Leave 30 minutes, scrub softly with an old toothbrush.
3. Wash as usual.

No chlorine bleach: it can make yellow stains darker.

Chocolate

1. Let it harden, scrape off what you can.
2. Rinse cold from the back.
3. Enzyme detergent, leave 15 minutes, wash.

Candle wax

1. Harden with an ice cube, scrape gently.
2. Paper towel on each side, warm iron on top: the wax melts into the paper.
3. Dab any colour mark with rubbing alcohol.

Ballpoint ink

1. Paper towel underneath.
2. Dab, never rub, with rubbing alcohol on a cotton ball.
3. Change the paper towel as the ink moves, then wash.

Silk, wool, leather and "dry clean only" labels: blot with cold water and take it to a cleaner. Tell them what the stain is.

CHART 3

Surfaces & what never to mix

The tricks online forget to say where not to use them.

03

SURFACE	AVOID	USE INSTEAD
Marble, granite, limestone, travertine	VINEGAR · LEMON · BLEACH Acids etch the stone and leave dull marks.	MILD DISH SOAP · STONE CLEANER Warm water, soft cloth, dry well.
Wood floors & furniture	VINEGAR · SOAKING WET MOP Dulls the finish, water swells the wood.	WOOD CLEANER A barely damp mop, then dry.
Stainless steel	CHLORINE BLEACH · STEEL WOOL Causes spots and scratches.	BAKING SODA · DISH SOAP Soft sponge with the grain, dry with a cloth.
Brass, gold-colour & plated taps	LEMON · VINEGAR · SCOURING PADS Can strip the plating.	MILD SOAP & WATER Follow the maker's care sheet.
Glass-ceramic cooktop	SCOURING PADS · ABRASIVE POWDER	COOKTOP CLEANER Scraper blade held flat for burnt spots.
Non-stick pans	METAL SCOURER · METAL UTENSILS	SOFT SPONGE Soak in warm soapy water for stuck food.
Cast iron	DISHWASHER · SOAKING	HOT WATER & BRUSH Dry on the heat, wipe a thin film of oil.
Good knives	DISHWASHER	HAND WASH Wash, dry straight away, put away.
Screens (TV, tablet, phone)	VINEGAR · WINDOW CLEANER	DRY MICROFIBRE Then the maker's instructions.

NEVER MIX THESE, NOT EVEN IN THE SAME SINK

Bleach + vinegar releases chlorine gas.

Bleach + ammonia (many glass cleaners contain ammonia) releases toxic chloramine gas.

Bleach + rubbing alcohol forms harmful compounds, including chloroform.

Hydrogen peroxide + vinegar in one bottle makes a corrosive acid. Use one, rinse, then the other.

One product at a time, rinse in between, and open a window.

CHART 4

Kitchen conversions & temperatures

For American recipes with a European scale, and the other way round.

04

SPOONS & CUPS

US	METRIC
1 teaspoon (tsp)	5 ml
1 tablespoon (tbsp) = 3 tsp	15 ml
1 fluid ounce = 2 tbsp	30 ml
¼ cup = 4 tbsp	60 ml
⅓ cup	80 ml
½ cup	120 ml
1 cup	240 ml
2 cups = 1 pint	475 ml
4 cups = 1 quart	950 ml

WEIGHT

1 ounce (oz)	28 g
4 oz = ¼ pound	113 g
1 pound (lb)	454 g
1 kilogram	2.2 lb

ONE CUP OF… WEIGHS

INGREDIENT	1 CUP ≈
All-purpose flour	125 g
Granulated sugar	200 g
Brown sugar, packed	220 g
Powdered sugar	120 g
Butter (2 sticks)	227 g
Rolled oats	90 g
Uncooked white rice	185 g
Honey	340 g
Milk or water	240 g

1 stick of butter = ½ cup = 8 tbsp = 113 g. Flour is spooned into the cup and levelled, not packed. Weights are rounded averages.

OVEN

FAHRENHEIT	300°F	325°F	350°F	375°F	400°F	425°F	450°F
Celsius	150°C	160°C	180°C	190°C	200°C	220°C	230°C
Gas mark	2	3	4	5	6	7	8

Fan or convection oven: about 20°C (25°F) lower, or check a few minutes early.

SAFE INSIDE TEMPERATURE · USE A FOOD THERMOMETER

165°F · 74°C
Poultry, stuffing, casseroles, leftovers

160°F · 71°C
Ground meat, sausage, egg dishes

145°F · 63°C
Beef, pork, lamb steaks & roasts, then rest 3 min

145°F · 63°C
Fish, or until it flakes and is no longer translucent

Sources: FoodSafety.gov safe minimum internal temperatures. Fridge 40°F (4°C) or below, freezer 0°F (−18°C).

MERCI, MA CHÈRE

One last thing.

If one of these charts saves you a chicken, a blouse or a marble counter, tell me in the comments. I read them all.

And if you like the way I check things, the Big Book of Verdicts has 101 kitchen and home tricks, each one checked, explained and fixed. It is coming soon on odettesays.github.io, and you will hear first if you are on my Sunday letter.
